

Wall-Mounted Table without Benche

INCLUDED FOR INSTALLATION:

- 6 mounting screws 6.10x70 mm for installation on masonry walls
- 6 wood screws 5x80 mm for installation on plasterboard or panel walls
- 6 Expandet Let Rosett anchors for installation on plasterboard or panel walls
- 2 brackets for gas springs
- 4 screws 3.5x16 mm for mounting the gas springs

MEASURE UP FROM THE FLOOR TO DETERMINE WHERE THE LOWER 3 SCREWS OF THE FOLDING TABLE ARE TO BE MOUNTED:

TABLE SIZE	TABLE HEIGHT	DISTANCE FROM FLOOR
Small folding table	530 mm	229 mm
Medium folding table	580 mm	279 mm
Large folding table	720 mm	364 mm

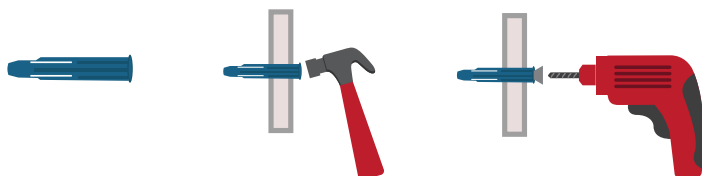

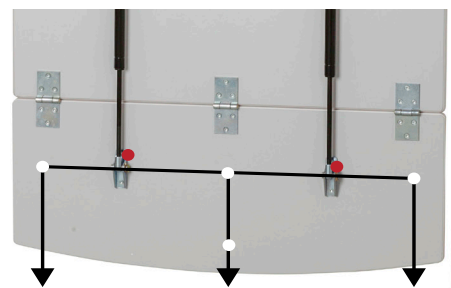

Mark the screw height with a line. Ensure that the line is perfectly level, as this is essential for correct installation of the table.

INSTALLATION ON A MASONRY WALL

Hold the tabletop against the wall and pre-drill holes through the mounting bracket on the table and into the wall using a 6 mm drill bit for the 6 mounting screws. Mount the table to the wall using the 6 mounting screws 6.10x70 mm. Use a spirit level during installation.

INSTALLATION ON A PLASTERBOARD OR PANEL WALL:

Pre-drill 4 holes in the table mounting bracket and 2 holes in the locking bracket using a 4 mm drill bit. Hold the tabletop against the wall and mark the 3 lower pre-drilled holes on the marked line on the wall. Mark the remaining pre-drilled holes as well. Remove the table and pre-drill the marked holes in the wall using an 8 mm drill bit for the 6 Expandet Let Rosett anchors. Install the Let Rosett anchors in the pre-drilled holes so that they are flush with the wall surface.

Mount the table to the wall using the 6 wood screws 5x80 mm, ensuring that the screws pass through the table mounting bracket and into the Let Rosett anchors. Use a spirit level during installation.

Once the table is mounted on the wall, install the 2 gas spring brackets using the 4 screws, and then snap the gas springs onto the brackets. See the illustration for the correct placement of the gas spring.
